

REMIT WG

ECRB Meeting

April 2021

M. Sc. E. E. Elton B. Radheshi
Chairmain

6-th Working Group online meeting took place on February 05-th 2021

State of play

- AL will transpose REMIT as regulatory act following the example of ERO. ERE had an informal consultation and is reviewing the comments before a public hearing. Adoption expected by end of April
- BiH: The registration of market participants started and the national register is published. The registry will be submitted to ECRB for preparation of central registry.
- KS*: ERO completed the format to be used for registration and will share that with market participants. ERO plans to organise a workshop during this year.
- ME informed that will assess the possibility to adopt parts of REMIT as regulatory act if the newly formed Government does not take a decision on the transposition of REMIT through the law.
- MD: Government is working on Law amendments which include also REMIT provisions. The legislative changes are ongoing and ANRE is working in parallel to start developing a regulatory act that can be put in force once law changes have been adopted.
- MK: Ministry of Economy is preparing a wider set of amendments not only related to REMIT. Expectation is that it will be adopted by Gov initially and Parliament on the second quarter of the year. ERC will need 3 months to make the necessary amendments to its regulatory acts;
- SR: The Gov is working on amendments in the Energy Law and this may include the basis of transposition of REMIT as a regulatory act.
- GE: A regulatory act which includes REMIT provisions, incorporated into energy market monitoring regulation is being consulted. Workshop to be organised end of Feb for market participants in GE.
- UA: NEURC draft Law is in the process in the Parliament and two additional draft Laws have been registered with Parliament. The outcome is not clear.
- TR: Some amendments on the legislation in gas sector in relation to monitoring the prices and sanction are being drafted.

On March 26-th the Secretariat has launched dispute settlements procedures against Montenegro and Ukraine for lack of transposition regarding the REMIT regulation.

The WG has been composed by the following TF

- **TF 1: Regulatory Guidance on REMIT**

- Document was made available and will be submitted to members for remarks. Members will be invited to provide questions regarding interpretation of certain provisions of REMIT. Feedback should come in the form of questions and also answers, having always in mind the consistency with ACER's guidance.

- **TF 2: Maintenance of central registry**

- options on automatizing the process of registration and central registry were presented in the meeting. Some details will be discussed bilaterally with ECRB Section and a more concrete proposal may come at the next REMIT WG meeting.

- **TF 3: Inside information platform**

- The key area of work is to perform a survey by looking into the EU and ACER practices regarding establishment of Platforms for publication of inside information. Slides are uploaded as the meeting material.

- **TF 4: Implementation of REMIT**

- A draft concept on how the activity on this TF will be performed was presented during the meeting. The draft questionnaire was presented and it was agreed that the questionnaire will be submitted before the end of Q2 with the hope that some of the on-going processes in the Contracting Parties will be completed. The questionnaire will be initially submitted for consultation with WG members and then for completion.

In the meantime a joint workshop between ACER and ECRB on Remit implementation was held on March 11-th

A regulatory school on Remit regulation was also held on February 15-th

Next WG meeting agreed to be held online on the 11-th of May
